SUMMARY

I'm Loris Canolli, an IT professional and full-stack developer passionate about technology, infrastructure, system administration, and software development.

My work combines practical IT support with the development and deployment of modern web applications. I work with hardware, operating systems, networks, organizational IT systems, servers, databases, and application development.

I enjoy troubleshooting technical problems, maintaining reliable IT environments, automating processes, and building applications that solve real-world problems.

PROFESSIONAL EXPERIENCE

IT support within an educational institution, covering end-user support, system administration, and network operations.

IT Support

- Providing technical assistance to academic staff and students.
- Troubleshooting Windows computers.
- Diagnosing hardware and software problems.
- Installing and configuring operating systems.
- Printer installation, configuration, and troubleshooting.
- Supporting classrooms and examination rooms.
- Troubleshooting computer peripherals.
- Providing remote technical assistance.
- Resolving daily office IT problems.

IT Administration

- Google Workspace administration (Google Admin Console).
- Managing user accounts, password resets, and account security.
- Managing organizational groups.
- Account suspension and administration.
- Supporting Moodle.
- Windows administration.
- Linux administration (Ubuntu Server).
- SSH and remote server management.
- Apache configuration.
- Cloudflare.
- Tailscale.

Networking

- Network troubleshooting and diagnostics.
- TCP/IP, DNS, and DHCP.
- Wi-Fi configuration.
- Router and access point troubleshooting.
- Basic Cisco IOS configuration.

TECHNICAL SKILLS
